DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Bradley on 11-12-04.

The application has been amended as follows:

In claim 1 line 1 before the transition comprising inserted -- for sensing well fluid pressure--,

In claim 1 line 1 after the word comprising inserted -- well fluid conduit--

In claim 1 line 2 after member inserted --in fluid communication with well fluid in the well fluid conduit--

In claim 1 line 5 after the phrase sensed pressure, inserted -- of the well fluid in the well fluid conduit; --

IN claim 1 line 7 after the phrase hydraulic fluid in the tubular member, inserted - in an annular space

In claim 1 line 8 before the word member inserted tubular

Allowable Subject Matter

1. Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance: The cited prior art does not disclose nor suggest an insert, hydraulic fluid and dimensions of a tubular member being such that during use of the apparatus, the hydraulic fluid pressure transmitted to the pressure sensor is substantially independent of temperature changes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 5535827, 5796007, 5255743 and 5299642 teach pressure sensing apparatus's that relate to hydraulic supplies.
